## **STUD DOG INFORMATION:**

Registered Name:

Call Name:

DOB:

Registration #:

## **BROOD BITCH INFORMATION:**

Registered Name:

DOB:

Registration #:

1. Bitch owner must provide the stud owner with copies of AKC registration papers, OFA hip/elbow clearances, immunization record including rabies, three-generation pedigree, and two photos (one side profile and one head shot) prior to stud service. Proof of a recent, no more than 1 month prior to breeding, brucellosis test is also required for natural breeding. If our stud dog is a carrier of any disease brood bitch must be tested prior to breeding. Knowing that artificial insemination is a very useful tool in a breeding program we are just beginning in this, so feeling we are not yet experienced enough to offer this option, we are not doing artificial insemination or shipped semen. Please keep checking back for updates on this as with time it is our goal to offer this option.
2. Bitch should be brought to our facility no later than her 7th day of cycle, unless prior arrangements are made with the breeder. **\*Be sure to bring food for her\*** We will keep her until she no longer accepts the stud dog.
3. Stud fee- \_\_\_\_\_. Half is due at time of breeding. The other half due within 10 days of the litter being whelped. AKC papers will **not** be signed before fee is paid in full. (Our fee is refundable if we choose to take the option of a litter pick. See #6.)
4. All breedings will be conducted at the facility belonging to the owner of the stud unless otherwise arranged. ( We may agree to meet at a veterinarian who does semen collection and artificial insemination for artificial breeding, if local.)
5. If no puppies result (two puppies is considered a litter), another service will be provided with the bitch owner being responsible for any costs such as progesterone testing or any veterinary expenses the bitch may have that may incur for the rebreed. One time rebreed only per bitch.
6. If the fee is to be "pick of litter", the owner of bitch agrees that it shall be the stud owner's pick at age 7-8 weeks, and this option will be only upon prior agreement of both stud and bitch owners.
7. Puppies from this breeding are not to be sold to pet shops or to testing laboratories, nor donated for auction or raffle purposes. Puppies from this breeding **shall** be sold with **limited**

registration until OFA hips and elbows are done, not prior to 15 months of age, and rate fair or above. In no way shall puppies produced from this litter be used for breeding dilute colors or cross breeds. Please respect our desire to keep our bloodlines pure and true to the Labrador breed standards.

As the owner of the bitch, I release Briar Hill Labradors from liability due to injury or accidental death, or loss (such as dog running away or climbing out of kennel) or contraction of any airborne illness or parasites during or after the duration of stay at our kennel or fertility clinic. I will also not hold Briar Hill Labradors responsible for loss of property (such as leashes, bowls, kennels, etc) or damage to such. I also agree should emergency services be needed that I allow Briar Hill Labradors to take my bitch to the closest animal hospital. I also agree if any additional costs such as vetting etc., be incurred that I will be held responsible for those costs. \_\_\_\_\_ (initial)

As the owner of the bitch, I am sure that she is in good health, free of parasites and up to date on all vaccines and has a current brucellosis test. \_\_\_\_\_ (initial)
